High Pigment Digital Printing Ink

Glaze Layer

Engobe Layer

Tile Body

Glazed Vitrified Tiles

Tile Body

The finest quality raw materials make up the resilient and robust tile body of Monolith tiles. The raw materials are ethically sourced and sustainably processed.

Engobe Layer

A highly opacous, fusible, and permeable engobe layer makes the second layer of the tiles of Monolith. The layer makes the tiles highly resistant to water absorption for longevity.

Glaze Layer

A high-quality glaze coating is added to the engobe layer of the Monolith tiles giving the tile properties of texture and shine and making them ready for design and color.

High Pigment Digital Printing Ink

The Monolith surfaces get their unique and versatile properties of the design, color, and more in this stage where digital printing is done on the glaze with high pigment ink for excellent results.

Aetious

Ceramics & Innovation

A confluence of art,
design, and
craftsmanship.

Application Areas

Residence

Offices

Public Places

Shops

Hotels

Malls

Airports

EASY TO CLEAN

The superior glaze of the collection makes the surfaces easy to clean and low maintenance.

STAIN RESISTANT

Do not worry about spills and stains with the high stain-resistant glaze of the premium Monolith surfaces.

SCRATCH RESISTANT

Enjoy new-looking surfaces for a very long time with highly scratch and abrasion-resistant surfaces.

Technical Features

Easy To
Maintain

UV
Resistant

Resistant To
Chemicals

Resistant To
Acids

Prevents Bacterial
Growth

Heat
Resistant
